Pilots and dispatchers use this data to plan routes, fuel loads, and alternate airports.

Operational Limitations and Safety Considerations

The AFM explicitly states the limitations to prevent situations that could compromise safety:

- Avoid exceeding the maximum operating speed (Vne).
- Do not operate beyond the certified maximum gross weight.
- Maintain proper CG within prescribed limits to ensure aircraft controllability.
- Adhere to environmental limitations, such as temperature and pressure restrictions.
- Observe system limitations to prevent damage or failure, e.g., engine parameters, electrical loads.

Ignoring these constraints can lead to dangerous situations, including structural failure, engine damage, or loss of control.

Emergency Procedures and Handling

The AFM provides detailed steps for handling in-flight emergencies:

- Engine Failure: Procedures for single-engine operation, feathering, and securing systems
- Fire and Smoke: Identification, containment, and extinguishing techniques
- System Failures: Electrical, hydraulic, or fuel system malfunctions
- Rapid Decent: When to initiate, techniques to maintain control
- Emergency Landing: Site selection, approach configuration, and post-landing actions

Mastery of these procedures, often supported by simulator training, enhances pilot response in critical situations.

Maintenance and Troubleshooting Guidelines

While primarily a flight operation manual, the AFM also touches on maintenance considerations:

- Pre-flight and post-flight inspections to detect abnormalities
- Monitoring engine parameters such as N1, N2, exhaust gas temperature (EGT), and oil pressure
- Troubleshooting common issues based on system indicators
- Limitations on repairs and component replacements to maintain certification compliance

For detailed maintenance procedures, operators rely on the Aircraft Maintenance Manual (AMM), but the AFM provides essential safety boundaries.

Updates and Revisions

Aircraft manuals are living documents that evolve:

- Operational Bulletins: Issued to update procedures or limitations based on new information
