Constructing a UML Component Diagram for LMS

Step-by-Step Approach

- Identify Major Components: Based on system requirements, list modules like User Management, Catalog, Borrowing, Fines, Notifications, and Reports.
- Define Interfaces: Establish the services each component provides or consumes, focusing on clearly specifying each interface's purpose.
- Determine Dependencies: Map out how components interact, referencing interfaces and data flows.

- Arrange and Connect Components: Use UML conventions to draw components as rectangles with compartments, connect them with dependency arrows, and denote interfaces with lollipop symbols or interface rectangles.
