Understanding the Structure of the AQA Chem2 June 2013 Mark Scheme

Purpose and Design

The mark scheme for the June 2013 Chem2 paper was meticulously crafted to align with the assessment objectives outlined by AQA. Its primary purpose is twofold: to provide clear guidance on how marks are awarded for each question and to ensure consistency and fairness in marking. The scheme emphasizes not just the correctness of answers but also the reasoning processes, methodical approach, and scientific understanding demonstrated by students.

The structure of the mark scheme typically follows the format of the exam questions, with each question subdivided into parts that target specific learning outcomes. For each part, the mark

scheme details:

- The expected correct answer or key points.
- Alternative acceptable responses, including synonyms or equivalent scientific terms.
- Common misconceptions or errors that do not warrant full marks but may earn partial credit.
- Specific marking points and the criteria that must be met for marks to be awarded.

This detailed framework helps examiners assess responses with consistency, and it provides students with a clear understanding of what is required for full marks.

Levels of Marking and Awarding Partial Credit

The scheme employs a nuanced approach to marking, often using levels or bands that reflect the depth and quality of responses. For example:

- Full marks are awarded when all key points are correctly identified, and the reasoning is sound.
- Partial marks recognize responses that demonstrate some understanding but lack completeness or contain minor errors.
- Indicative content guides markers on acceptable points that may vary slightly from the model answer but still demonstrate sufficient understanding.

This approach encourages students to develop comprehensive answers, knowing that partial credit is available for partially correct or incomplete responses.
